

# BETWEEN FIELD AND FORK

Food and drink manufacturers are the vital link in the food supply chain, taking raw produce and turning it into products that are sold by retailers and caterers to millions globally.

- Our industry is an invaluable partner to agriculture, buying two thirds of UK farm produce
- Over 6,000 UK food and drink manufacturers work to deliver real product diversity
- We are working across the whole of the food supply chain to reduce its environmental impact

We are critical to the future success of the UK food chain as, without a competitive UK food manufacturing base, UK farmers would lack a ready market, resulting in less resilience against the effects of climate change, higher global demand and increased pressure on finite resources.
