UK regulations and how they affect UK businesses

The Environment Agency's road map aims to cut the UK's carbon emissions by 45% by 2030

- The **Energy Savings Opportunity Scheme (ESOS)** requires large organisations in the UK to undertake mandatory assessments every four years looking at energy use and energy.

- The **Streamlined Energy and Carbon Reporting Regulation** (SECR) makes it mandatory for large businesses in the UK to annually report on their energy and carbon emissions as well as any efficiency measures.

ESOS Is Just the Start. *What Will You Do With the Data*?

From compliance to continuous improvement.

- **Site-level benchmarking and process efficiency**
- **Accurate budgeting and CapEx business cases**
- **Evidence for Energy Intensive Industries (EII) exemptions**
- **In food and drink manufacturing, every kilowatt matters**

Still Using Spreadsheets and Bills? *You're Not Alone*.

Manual methods are holding manufacturers back.

- **Monthly invoices**
- **Visual meter reads**
- **Disconnected spreadsheets**
- **If your site runs 24/7, you need next-day insight, not next-month surprises**

How Same-Day Data *Helps You Take Action*, Not Just Report

What practical energy insight looks like, and how it helps on the ground.

- **Bring together data from your existing meters, BMS or invoices**
- **Understand usage by site, shift, or equipment type**
- **See yesterday's usage today, across cost, carbon, and consumption**
- **Reduce the admin burden of compliance**
- **Stay aligned with where the industry is going**
