2024 salt and calorie targets

UK salt reduction has been achieved through a number of stepwise reductions, allowing for consumers' palates to adjust over time. Nutritional targets for both salt and calorie content have been set, to be achieved by 2024, with guidance and maximum levels for salt, sodium and calories.

We have summarised just some of these targets in our condensed guidance sheets .

Please consult the full documentation before beginning your reduction project:

Reformulation guides

Feeling confused about the process of reformulation?

Our reformulation guides explain the eight principles of reformulation, with information on each of the nutritional components and helpful tips for achieving your reformulation goals:

Light reformulation guide

Comprehensive reformulation guide

Reformulation guide for bakers

Sensory analysis guide

The adjustment of a product can be an unsettling concept for a brand, which is why Reformul8 are committed to supporting industry with the tools to allow them to do so with confidence.

Our guide has been developed to give SME food manufacturers the tools to carry out their own sensory analysis, in a way that suits them. Download our interactive worksheets for free.
